Dynamic Mood Light

Avea transforms your home with beautiful dynamic light moods. Control your ambience from your iPhone or iPad and unwind in one of the carefully crafted settings with subtly changing light.

After a relaxing evening, simply set your alarm using the built-in wake-up light scene. With Avea, rise and shine along a natural sunrise, right in your bedroom.

Avea connects directly to your iPhone or iPad using Bluetooth Smart technology, without requiring additional gateways or bridges.

But it doesn't stop there: once you have chosen a light scene, the smart LED lightbulb will take care of the rest, not requiring a constant connection to your iPhone or iPad.

Connect more than one Avea, and they will automatically coordinate their lighting to create an even more immersive atmosphere.

What's in the Box

- Elgato Avea light bulb
